

**Outcome 7.3: evaluate response to economic disparity**

In small groups, create a new social program for Newfoundland and Labrador that would help address the needs of one or more groups in the province. Consider the perspectives of stakeholders and the influence this program would have economically, politically, and socially on quality of life.

Group Members	
---------------	--

Cause and Consequence	
Describe a social program that would meet an important need in NL.	
Possible benefits economically, politically and socially	Possible harm economically, politically and socially

<b>Significance</b>	
Will this affect a large or small group of people?	Who will be affected most? The least?
<b>Perspective</b>	
Identify three possible stakeholders in this issue. How are they connected to the issue and what are their goals?	
Stakeholder 1:	
Stakeholder 2:	
Stakeholder 3:	
<b>Communicate</b>	
How would you go about making the government and the people of NL aware of the need of your program?
